Useful Resources

Below is a compilation of web links. Hopefully these resources will help improve your learning experience.

Informative Web Sites

- Java Applets for Machine Learning Note: The applets are in German ** Page not accesible. Message: The page you want to visit cannot be displayed.

- A Brief Introduction to Machine Learning by Gunnar Ratsch

- CS229 Machine Learning - Stanford - This is the Stanford CS course on Machine Learning that Prof Ng has taught for a number of years. The material parallels the Coursera course, but covers some additional topics and goes into much more depth on the mathematics.

- Dive into Machine Learning compiles a variety of resources, taking a hack-first approach so you can get "hooked." Prof. Ng's course is the centerpiece.

- Cornell Virtual Workshop Training on programming languages, parallel computing, code improvement, and data analysis.

Linear Algebra

- Introduction to Linear Algebra

- CS 229 Section notes on Linear Algebra

- Free linear algebra book with solutions

Writing Equations in Forum Posts

- Short Guide to LaTex Math Here is a quick guide to entering equations using LaTeX. The directives are inserted between two dollar signs. For example, the fraction for one half is entered as \$\$ \frac{1}{2}\$\$,(without any escapes before the dollar signs) and displays as $\frac{1}{2}$.

- LaTex Math Tutorial

Online E-Books

- Introduction to Machine Learning by Nils J. Nilsson

- Introduction to Machine Learning by Alex Smola and S.V.N. Vishwanathan

- Introduction to Data Science by Jeffrey Stanton The link appears to be dead, here is another.

- Bayesian Reasoning and Machine Learning by David Barber

- Understanding Machine Learning, © 2014 by Shai Shalev-Shwartz and Shai Ben-David

- Elements of Statistical Learning, by Hastie, Tibshirani, and Friedman

- [Pattern Recognition and Machine Learning, by Christopher M. Bishop](#)

Textbook information

- (none)

Advanced classes online

- [Andrew Ng's advanced lectures - YouTube](#)

- [Machine Learning - CosmoLearning](#)

- [Machine Learning - AcademicEarth](#)

- [Learning from Data - Caltech](#)

- [Machine Learning - MIT](#)

- [Machine Learning - U. of Washington - via Coursera](#)

- [Big Data, Large Scale Machine Learning - NYU (not a MOOC)](#)

- [Machine Learning UBC 2013 - Youtube](#)

- [Neural Networks Demystified](#)

Machine Learning frameworks and libraries in Python

- [PyBrain](#): Various machine learning algorithms for Python programmers. Focuses on neural networks.

- [PyML](#): Machine Learning object oriented framework for Linux and Mac OS X focused on classification and regression by Asa Ben-Hur.

- [scikit-learn](#): Comprehensive Machine Learning toolkit for Python (based on SciPy with numpy and mathplotlib). "Ipython -pylab" provides interactive environment like Octave - scikit-learn provides optimized implementations of pretty well everything (using fast libraries like liblinear and libsvm). Should be used instead of Octave for research prototyping, production and especially for education.

- [tensor-flow](#): open source software library for machine learning.

Machine Learning frameworks and libraries in C++

- [mlpack](#): a scalable C++ machine learning library.

- [SHARK](#): a fast, modular, feature-rich open-source C++ machine learning library.

- [Dlib-ml](#): A Machine Learning Toolkit.

- [Waffles](#): A collection of command-line tools for researchers in machine learning, data mining, and related fields. All of the functionality is also provided in a clean C++ class library.

- [MLC++](#): a library of C++ classes for supervised machine learning.

Machine Learning frameworks and libraries in Java

- Weka: A collection of machine learning algorithms for data mining tasks.

- Apache Mahout: A scalable machine learning library .

- LIBLINEAR : LIBLINEAR -- A Library for Large Linear Classification. I think this link was mentioned in one of the lectures.

- Deeplearning4j: Open-source, distributed, deep-learning library for the JVM. Integrated with Hadoop and Spark, DL4J is designed to be used on distributed GPUs and CPUs.
